

# SEO & Online Marketing

## SEO Audit Report

Website launching and marketing should always start with a thorough, informative and clear SEO audit to avoid failure and disappointing results. We place your website under the microscope of our SEO consultants and provide a detailed audit report. Our SEO experts give clear action points to address specific areas within your website that need improvement. This professional advice can help you to avoid costly mistakes and achieve high ethical rankings across all the major search engines.

SEOAuditing: A Necessary Business Investment with no substitute for a serious online venture.

## Search Engine Submission

Are you frustrated by the lack of traffic coming to your website from the popular search engines? Once you have optimized the website, the next step is to submit the site to all major search engines and directories. This is one of the important step that should be done very carefully. A mistake at this stage may end up in having your site blocked or black listed by search engines

You've probably seen the ads that promise: "We'll submit your site to the Top 3250000 search engines for only \$19.99!!!!" What 3250000 search engines? There just aren't that many. Some of these services are just scams: their main goal is to mine your email address and send you spam email in the hopes of selling you another useless service.

We have an audited list of search engines and directories (they are less than 500, not 3250000!!) which accounts for 99.9 % of the internet traffic. This type of listing also avoid getting black listed by the search engines due to the links coming from spam sites and directories. We manually submit your site (take hours and hours of hard work) to all these top search engines and directories at a very affordable price.

Before submitting your site, We will do a free audit and suggest any enhancements required for better ranking.

## Optimization & link Building

Website optimization is an important step that no webmaster should fail to do. Our SEO experts will do a complete audit of your website and do the required modifications at a very affordable cost. This service also include the link building advice (Suggest you with the sites and webmasters whom you have to contact for cross linking or for incoming links.)
